Rome, 21 March 2022

Telespazio and Iridium Partner to boost Aero & IoT markets

- Telespazio has signed a Value Added Reseller (VAR) Agreement with Iridium Communications Inc
- The new agreement will introduce new capabilities to Telespazio's service portfolio with a specific focus on the UAV segment

Telespazio – a joint venture between Leonardo (67%) and Thales (33%) – has signed a VAR "Value Added Reseller" Agreement with Iridium Communications Inc. to offer Iridium Certus[®] Aero and IoT services on board UAV/Drones/Small aircrafts/Helicopters and for IoT applications.

Telespazio has been appointed by Iridium as an official distributor of Iridium Certus Aero and IoT products and services. This Agreement further strengthens the long-standing cooperation between Telespazio and Iridium and will introduce new capabilities to Telespazio's service portfolio. These capabilities will help to remove connectivity barriers faced by terrestrial IoT and aero markets with a specific focus on the UAV segment, one of Telespazio's areas of expertise.

With these capabilities Telespazio will enable a whole new paradigm for the IoT and Aero markets by granting connectivity in any working scenario.

"We are delighted to have strengthened our partnership with Iridium for the Iridium Certus Aero and IoT services delivery. Leveraging on our service portfolio, we're targeting to improve and expand our effectiveness in Aero and IoT market with a particular focus on communications for drone/UAV," said **Alessandro Caranci**, Head of Satellite Communications at Telespazio.

"Telespazio's expertise and technical capabilities make them an ideal partner for Iridium, particularly when it comes to the growing market demand for UAVs and drones operating beyond line of sight," said **Bryan Hartin**, Executive Vice President, Iridium. "By integrating our Iridium Certus 100 service with their existing portfolio of solutions, Telespazio is empowering their customers to take advantage of the world's only network proven to enable operations to and from anywhere on the planet."

Telespazio, is a world leading operator in the space services sector, managing the design and development of space systems, the launch and in-orbit control of satellites, Earth observation services, integrated communications, navigation and satellite localisation, and scientific programmes. Telespazio plays a leading role in its reference markets by leveraging the technological skills acquired in over 60 years of business, as well as its infrastructure and participation in space programmes such as Galileo, EGNOS, Copernicus and COSMO-SkyMed. Telespazio is a joint venture between Leonardo (67%) and Thales (33%); in 2020, it generated 540 million euro in turnover, and it currently employs 3,000 people in nine countries.
